

*OZRoll Drive System...*

# Oz Roll Drive System...

A REVOLUTIONARY YET SIMPLE AND UNIQUE DRIVE SYSTEM TO SUIT ROLLER SHUTTERS AND SOLAR SHADING.

The Oz Drive system is a low voltage battery operated drive system that is not reliant upon mains power. With operation at the touch of a button this unique system offers a cost effective alternative to current control options with many other additional benefits including a more efficient installation

The motor can be fitted into the axle (T20 Tubular Motor) or mounted on the end plate (L10 Lateral Motor). Each motor is equipped with a low voltage cable which is connected directly to the back of the wall plate or to the fixed switch allowing for power to be generated through to the motor.

Both the portable controller and the fixed switch are equipped with re-chargeable batteries that can be easily charged via a number of convenient options. The E-Fix also has the option of charging using Solar Energy.

## Features & Benefits

- Low Voltage Battery Operation - Not reliant on mains power
- Simple, Safe and Cost efficient installation
- Perfect for narrow shutters
- Available in RF with Remote Control
- Ideal for retro fitting to existing shutters
- Multiple shutters can be operated with a single Controller
- Charging is both simple and convenient
- Simple operation for the whole family
