WHY CHOOSE INVISI-GARD?

Invisi-Gard is the premium security screen solution by Alspec — an Australian owned, market leader for over 45 years in the design of innovative aluminium systems to architectural, residential, industrial and home improvement markets.

Heavy duty extruded aluminium perimeter frame for extra strength. 10x the strength of the Australian Standard in terms of absorbed energy.

Invisi-Gard has been designed by Alspec's in-house R&D Team and manufactured in Australia by our Licensed Dealer Network.

Invisi-Gard's 316 Marine Grade Stainless Steel Mesh is a high tensile woven mesh resulting in an exceptionally strong, corrosion resistant product.

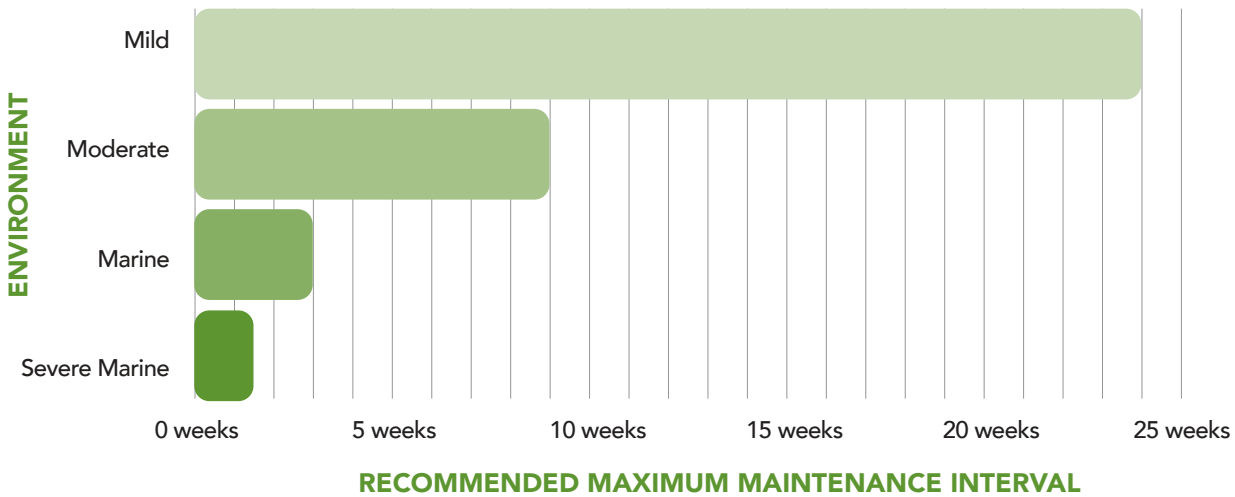
With over 400 dealers nationwide, Invisi-Gard is Australia's largest network of licensed fabricators.

Invisi-Gard is supported by lifetime warranty from Alspec, a wholly Australian owned company that has been in business for more than 45 years.

Invisi-Gard is BAL rated to protect your home against bushfires in areas from BAL-LOW up to and including BAL-40.

Your Invisi-Gard® Stainless Steel Security Screen should only ever need to be washed down with a soft brush using warm water and a mild detergent. Rinse well with fresh water to remove any detergent residue. Do not use strong detergents or abrasive cleaners as they may scratch or damage the surface finish.

The frequency of this maintenance is determined by the location of the product. Refer to the suggested maintenance table.



STAINLESS STEEL SECURITY

Combining the strength of Marine Grade 316 Stainless Steel with the beauty, strength and "flexibility of aluminium, INVISI-GARD® Security Screens offer unparalleled clarity of vision with enhanced security.

Stainless Steel Mesh - The Facts

When buying a stainless mesh product, ensure that you are purchasing only the highest quality. INVISI-GARD® screens offer you that quality with a woven wire product that is manufactured using a marine grade 316 High Tensile (900MPa) Stainless Steel Wire. This is then pre-treated and powder coated, with the highest quality powder coating available.

Confidence in Security

Using the unique, patented INVISI-GARD® Pressure Retention and Isolation Method, you can be assured that the Stainless Steel Mesh will defy the most determined attack from both intruders and corrosion.

INVISI-GARD® Stainless Steel Security products do not require screws to secure the mesh into the perimeter frame. As a result, the potential for corrosion through dissimilar metal contact is avoided.

Tested and approved in accordance with Australian Standards, INVISI-GARD® delivers confidence in security.

What does it mean for me?

There are many stainless steel mesh products on the market that do not meet the requirements of Australian Standards. Typically these products:

- Are not using high tensile stainless steel wire (900MPa)
- Do not track the composition of the wire through Chemical Certifications
- Are lacking in pre-treatment for corrosion prior to powder coating
- Do not use the highest quality outdoor UV resistant powder coat

INVISI-GARD® uses only the highest quality of mesh available to the market and supports this with a lifetime warranty allowing you peace of mind for many years to come.
